

# Fitness Tracker Analytics Dashboard

## DevAlpha Internship - Task 2: Visualization Study

A Power BI dashboard developed to visualize fitness tracker data and uncover insights related to activity levels, calories burned, sleep duration, heart rate, and exercise behavior.

## Key Findings

- Average Steps: 7.89K
- Average Calories Burned: 330 kcal
- Average Sleep Duration: 7.4 Hours
- Average Heart Rate: 121 BPM
- Cardio is the most common exercise type.
- Higher activity levels correspond with greater calorie burn.

## Recommendations

- Promote step-goal achievement through gamification.
- Develop personalized fitness recommendations.
- Integrate recovery and sleep metrics into performance tracking.
- Leverage heart-rate insights for smarter training guidance.
